

TarantulApp — Official Partner Program (one-pager)

Official Partner Invitation

For: WooCommerce shops and distributors (tarantulas, feeders, substrates, enclosures)
Invitation: Official Partner — we mirror your catalog in the app and send keepers to your store
Checkout: Always on your website (traffic tagged with UTM)

What you get

Feature	Detail
In-app storefront	Public page: `tarantulapp.com/partner/your-brand`
Marketplace discovery	Your products in the main feed with an Official Partner badge
Clicks to your store	Keepers browse in TarantulApp; they buy on your checkout
Zero duplicate work	Sync from your Woo catalog — no manual listing uploads in our app
Optional cart handoff	Multi-item cart can open your Woo cart with UTM
Social-ready link	Share your storefront from the app

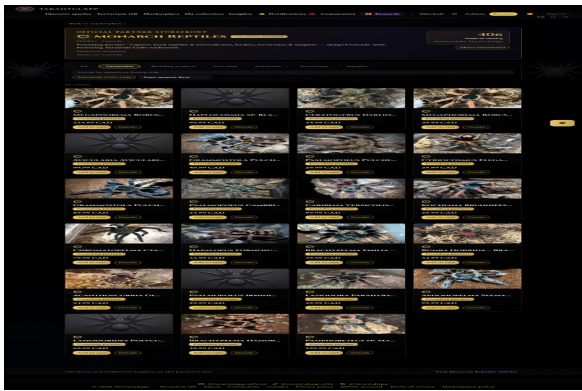

How it works

WooCommerce → Automatic sync → TarantulApp → Checkout on your website (UTM)

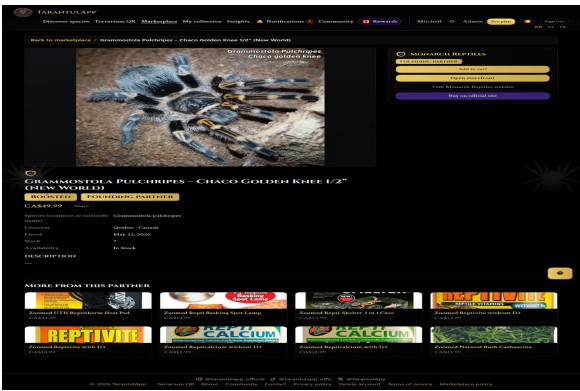

What we need

- 1. **WooCommerce** store with a reachable catalog (we test your URL).
- 2. **Authorization** to display selected products and link to your URLs (short doc to sign).
- 3. **~15 minutes** on a call: categories, shipping regions, optional cart test.
- 4. Keep your **website catalog updated** — sync picks up changes automatically.
